

Master Slide Drill®

Non-haz Protein Lubricant + Copolymer Beads

Product Description

- Water-based mud additive
- Environmentally safe; passes LC50; no sheen
- Dispersion of protein suspension fluid and copolymer plastic beads
- Creamy orange liquid
- 1.13 specific gravity
- Temperature stable

Function

- Mechanically and chemically lubricates
- Adheres / coats metal / wellbore
- Reduces friction

Benefits

- Improves slide drilling
- Reduces torque and drag
- Lowers fluid loss
- Increases ROP
- Improves logging / casing runs

Mixing Recommendations

- Master Slide Drill® can be mixed directly into the mud mixing hopper or suction pit.
- Mix 2% to 5% by volume in the entire mud system to control torque and drag.
- Mix 10% to 15% by volume in pill form to facilitate sliding operations, work product into wall cake formation by reciprocating and rotating drill string where practical.

Adheres; coats metal and wellbore

Reduces friction

Lubricates directional hole

Reduces torque and drag

Increases ROP

Improves casing/logging runs

**Adheres to and coats drill pipe and wellbore*
