

# Master Lube Coat®

## Food Grade Liquid Lubricant

### Product Description

- Water-based mud additive
- Environmentally safe; passes LC50; no sheen
- Food grade liquid lubricant
- Yellow liquid
- 0.8 to 1.1 specific gravity
- Temperature stable

### Function

- Lubrication / inhibition in water-based muds
- Attaches to and satisfies clays
- Coats metal surfaces
- Micro emulsion
- Water dispersable

### Benefits

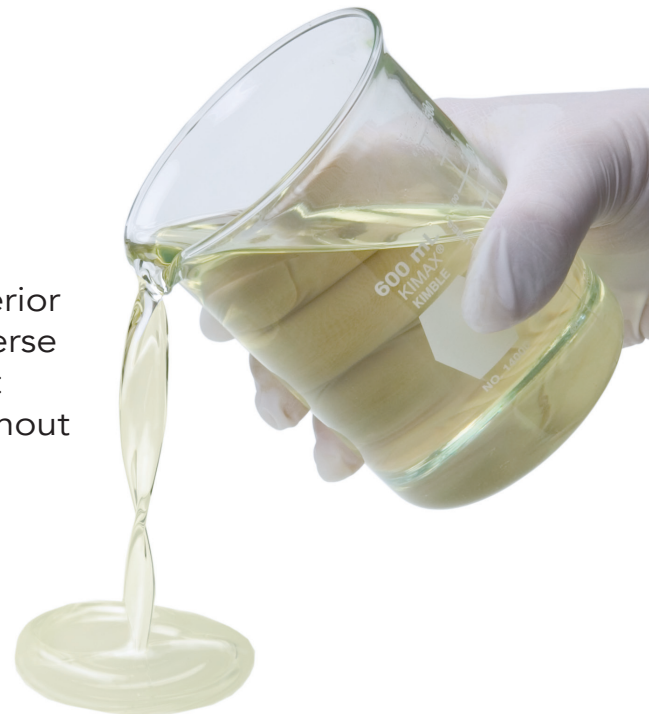

- Reduces BHA balling
- Lubricates entire fluid phase
- Reduces torque and drag
- Readily disperses into micro-droplets which lubricate and inhibit throughout entire mud system

### Mixing Recommendations

- Master Lube Coat® can be mixed directly into the mud mixing hopper or suction pit.
- Mix 2% to 5% by volume in the entire mud system for maximum benefits.
- Mix 3% to 15% by volume in pill form for sliding operations, then incorporate into the entire mud system.

Master Lube Coat® is superior in its ability to readily disperse into micro-droplets that lubricate and inhibit throughout your mud system.
